ISO 9001 CERTIFIED

Recomyde B30 P3 G50 BL01 is a recycled polyamide 6 injection moulding grade, reinforced with 50% glass fibre and heat stabilized. Black colour.

CHARACTERISTICS

Recomyde B30 P3 G50 BL01 is distinguished by high mechanical strength, hardness, rigidity, UV and thermo stability, and resistance to hot lubricants and water. Black colour.

APPLICATIONS

Recomyde B30 P3 G50 BL01 is used in a wide range of applications where a combination of mechanical properties and thermal resistance is needed. Glass-fibre reinforced grades are suitable for housings, supports, industrial articles and electrical insulating parts.

FORMAT AND STORAGE

Recomyde B30 P3 G50 BL01 is supplied in moisture-proof packaging. Typical formats are Big Bag, octavin, and 25kg bags. All containers are perfectly sealed. The product should be stored in a dry place and opened just before processing.

PROCESSING GUIDELINES

Drying

Material is supplied ready to process with low moisture content. When moisture absorption is prevented drying is not required. When drying is necessary, conditions are:

Drying temperature ≤ 80 °C

Drying time: 4-6 hours

Injection moulding

The recommended processing parameters for injection moulding are:

Melt temperature: 240-290°C

Mould temperature: 40-80 °C

Injection speed: medium to high

Back pressure: moderate

Shrinkage

The shrinkage of a moulded part is influenced by wall thickness, mould gating, and moulding conditions.

Moisture

A particular characteristic of reinforced polyamide 6 is its combination of moderate tensile and flexural strength with rigidity, good impact strength, and friction resistance. However, when a moulded part absorbs moisture, tensile and flexural strength decrease and toughness increases.

NOTE

All recommendations are based on knowledge and experience; The values have been established on standardized tests. The figures should be regarded as guide values and not as binding minimum values. As many factors may affect processing or applications, we recommend that customers make their own tests to determine the suitability of a product for its particular use.
