

**Directive (EC) No. 1907/2006
on the Registration, Evaluation, Authorisation and Restriction of Chemical Substances
(REACH)**

The REACH-Regulation is a firm component in our working process.
From the point of view of a commercial enterprise we take as follows stand.

Sources of delivery from the EU:

All of the suppliers have assured us that their substances have been pre-registered. Furthermore the registration for substances >1.000 to/y till 2010-11-30, 100-1.000 to/y till 2013-05-30 and 1-100 to /y till 2018-05-31 is done.

Distribution partners from third countries:

as known, we are distributor for Korea Polyacetal Co., Ltd (KPAC), Seoul, Korea, LOTTE CHEMICAL, Seoul, Korea, GS Caltex, Seoul, Korea and Hyosung Corporation, Ulsan, Korea. KPAC, LOTTE CHEMICAL, GS Caltex and Hyosung Corporation transfer the duties of the „only representative“ (OR) to different institutions.

Suppliers outside the EU:

All our suppliers have confirmed us that they have pre-registered till 2008-11-30 and registered their substances till 2010-11-30 (>1.000 to/y), 2013-05-30 (100-1.000 to/y) and 2018-05-31 (1-100to/y).

On 2008-1-28 the ECHA has published a list with 15 substances of Very High Concern (SVHC). This list was successive extended during the following years. With the deadline **2024-01-23**, finally **240** substances are on the SVHC- list.

Given the current information from our suppliers, we can assume that the formulation components of our products do not contain any substances requiring approval or any substances of particular concern from the currently valid SVHC list in mass concentrations above 0.1 wt%.

The REACH regulation includes a specific information obligation that requires companies to actively communicate along the supply chain. If there are any changes to the SVHC list in connection with our mixtures, we will comply with our obligation to provide information in order to continue to be your reliable partner.
